THERE is a movement to improve the average condition of the English farmer by inducing him to turn from the production of grain to the raising of cattle. It is recognized that the quality of American wheat is such that English wheat can not compete with it, and that many farmers of Great Britain would profit by the change.

The murder of one of the best citizens of Fayette County is due to the inefficiency of the penitentiary management at Frankfort, and it is imperative that a full investigation should be made and the blame placed where it properly belongs. The public should know why these outbreaks are frequent and how it is possible for convicts to march out of Frankfort in a body armed with needle guns and pistols. That a reform of prison management is needed cannot be doubted.

Among the numerous surprises which the progress of analytical science has sprung upon the undern cuisine are two of a very opposite, but equily interest-ing nature. One is that the opster, not-withstanding list highs sounding traditions and exclusive character, is after all little better lihan an impostor, being worth ma-tritively less than its own weight in milk. The other is that the cuember, nearly always partaken of with a certain in-ward misgiving as to consequence, is a ward misgiving as to consequence, is a most digestible and wholesome food.

These kinds of meat, all kinds of vegetables, plenty of bread and good coffee constitute the bill of fare at the camp of instruction at Louisville. The camp duties will be the same each day. In the forenoon there will be guard mountings and company drill. In the afternoon will occur the battation drills and dress parades. At night there will be camp guard duty, with relief every two hours. Governor Knott will be present on Thursday and review the troops. On Sunday next Bishop T. U. Dudly, Chaplain of the Louiscille Legion, will conduct religious exercises in the camp.

The reports made from the leading rade centers of the country indicate that trade centers of the country indicate that there continues to be a general improvement in the state of trade and business. As to failures there has been a large falling off, and there are reasons for believing that high water mark has been reached. There has been a gain in sales in the dry goods market, and jobbers and wholesale dealers are nucle, encouraged as to the fall trade. The demand for wool has been better than for a long time, and prices have been well maintained. The cotton crop is larger than was expected a month ago, and the average conjected a pected a month ago, and the average condition is much better. The business outlook is regarded as very encouraging.

Studies will be resumed on Monday morning, September lat, at the Academy of the Visitation, Mayawille, Ky. We have noticed with pleasure the flourishing condition of this elegant institution, and we heaitate not, to say that it ranks among the most thorough and best disciplined in our Republic. Among the many notably praise-worthy features in this institution, that of vigilance over those intrusted to the sisters' care ranks first, no pupil being allowed to leave the Academy during school hours without presenting a writen request from parent or guardi'm. Day pupils, who on account of living at a distance are necessitated to bring their dinners, are not permitted to leave the Academy at noon, consequently their parents may be assured that their daughters are not exposed to the noon-day sun or the inclemencies of the weather. We also learned, that at no time during the slay or night, ter the untils from under the watchful. that at no time during the day or night that at no time during the day or night, are the pupils from under the wachful eyes of the good sisters. As to the course of instruction in every department, it could not be surpassed, and one very apperfor advantage is that only sickness or death necessitates a change of teacher. Each sister carries her class through the entire course, and graduating honors are conferred on those only who bave thoroughly completed the prescribed course of studies. We hope the institution may continue to prosper and thus add an injuree ased lustre to our social circle. increased lustre to our social circle.
